

ENVIRONMENT MANAGEMENT POLICY

Senior Management and employees of Summit Hydraulic Solutions Ltd are committed to protecting the environment as a key component of sound business performance.

We are committed to providing quality hydraulics engineering and service in a manner that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment.

We will ensure full compliance with requirements of this policy and our developed Environmental Targets and Objectives.

This policy provides a framework for the documented Environmental Management System. It is endorsed by the Board of Directors and Senior Management of Summit Hydraulic Solutions Ltd and will be communicated to all employees and made available to the public and other interested parties upon request.

Objectives

Meet customer and community needs for environmental requirements on hydraulic drive systems, components, installations, site and workshop servicing.

Meet and strive to surpass environmental legislation and other requirements.

In a systematic and preventative manner reduce the environmental impact of our business activity.

Train, educate and inform our employees about environmental issues that may affect their work.

Work with methods for continuous environmental improvements.

Reduce the consumption of limited resources – promote the efficient use of resources including water, electricity, raw materials and particularly non-renewable resources.

Place demands on suppliers and contractors which are in line with the aim of the environmental policy.

Regularly communicate our environmental program to our clients, customers and the public and encourage them to support it.

In order to reach the Environmental Objectives we plan to:

- *Have no environmental incidents*
- *Have no non-conformances to legislation*
- *Implement two waste reduction or elimination activities per annum*
